

A PRACTICAL PILOT BUILT AROUND MEASURABLE GROWTH

A local customer engine for

True Diamond Finish.

A 90-day pilot combining local Meta advertising, a conversion-focused landing page and one clear CRM pipeline.

90 days	\$10/day	\$1,000
PILOT PERIOD	STARTING AD BUDGET	COMBINED PILOT FEE

THE PROMISE

We bring the right local car owners to one simple next step.

They can book directly through Square or leave their details for fast follow-up. Every lead and every closed job is tracked, so the next decision is based on evidence—not promises.

Prepared for	True Diamond Finish (CelMaura Inc.)
Prepared by	Autopilots & Smartleads
Date	July 30, 2026

1. Why this pilot

True Diamond Finish already has the hardest ingredients: a strong mobile service, a large library of before-and-after results, real customer proof and a team that knows how to close. The missing piece is a predictable route from local attention to a booked appointment.

Today, too much growth still depends on door-to-door work, manual follow-up and a broad website experience. The current website shows the full service range and already supports Square booking, but paid traffic needs a faster and more focused message: we come to you, we clean your car at your location, and booking takes only a few steps.

PILOT FOCUS

One local offer. One focused page. One measurable pipeline.

The pilot is intentionally small. It is designed to learn which audience, creative and offer produce qualified appointments within a practical service radius.

The customer journey

1. **See the ad** — A local car owner sees a clear before-and-after ad within the selected service area.
2. **Choose a next step** — The landing page offers two routes: book directly in Square or leave contact details.
3. **Get followed up** — New enquiries enter the CRM immediately and the True Diamond Finish team receives a clear action.
4. **Track the outcome** — Each lead is moved through the pipeline until booked, won or lost—with the reason recorded.

What success looks like

- A consistent source of local enquiries that does not depend on door-to-door availability.
- A landing page that leads with mobile convenience and local relevance.
- A visible pipeline from new lead to booked appointment and closed job.
- Enough clean data to decide whether to scale, adjust the offer or stop.

2. What we will build and run

Workstream	Owner	Included in the pilot
Landing page	Autopilots	Mobile-first page focused on “we come to you,” with local copy, proof, before/after content, direct Square booking and a lead form.
CRM & pipeline	Autopilots	Lead capture, source tracking, pipeline stages, owner assignment, status updates and a simple pilot dashboard.
Meta campaign	Smartleads	Local campaign setup, max. ±20 km radius, audience setup, copy and creative variations, testing and optimization.
Creative input	True Diamond Finish	Best before/after photos, available videos, testimonials, service details, pricing and brand assets.
Lead handling	True Diamond Finish	Fast contact, qualification, appointment confirmation, pipeline updates and accurate closed-job values.

Landing-page message

RECOMMENDED HERO

We come to you. Your car leaves looking like new.

Mobile detailing at your home or workplace in the selected local service area. Choose your service and book directly—or leave your details and we will help you find the right option.

- Primary action: Book your mobile detail.
- Secondary action: Get help choosing a package.
- Proof: real transformations, customer testimonials and the strongest three packages.
- Trust: clear service radius, response expectation, phone number and Square booking.

CRM pipeline

New lead → Contact attempted → Qualified → Appointment booked → Service completed → Won / Lost

Each record should include campaign, ad, service interest, booking status, estimated value, actual sale value and lost reason. This creates the evidence needed for the post-pilot pricing model.

3. Pilot investment and commercial terms

Item	Amount	Timing	Paid to
Pilot fee — first instalment	\$500	At approval	Autopilots & Smartleads
Pilot fee — final instalment	\$500	At the end of month 3	Autopilots & Smartleads
Meta media budget	Approx. \$10/day	Charged directly by Meta	Meta
Estimated 90-day media spend	Approx. \$900	Based on 90 days	Meta

The media budget is separate from the pilot fee and remains under True Diamond Finish’s control. Any third-party usage costs outside the items above—such as SMS or additional software licenses—must be approved before activation.

The honest break-even view

\$150	\$55	20%
AVERAGE REVENUE / JOB	CONTRIBUTION / JOB	ASSUMED CLOSE RATE

Using the figures discussed, 23 additional customers create about \$1,265 in contribution. That is a useful commercial milestone and roughly covers the \$1,000 pilot fee plus about \$265 in media.

Full 90-day payback is a higher bar. A \$1,000 pilot fee plus approximately \$900 in media equals about \$1,900. At \$55 contribution per customer, full break-even requires approximately 35 incremental customers.

Scenario	Customers	Revenue	Contribution
Commercial milestone	23	\$3,450	\$1,265
Full pilot break-even	35	\$5,250	\$1,925
At \$10 CPL + 20% close	18	\$2,700	\$990

IMPORTANT

A \$10 CPL is a guardrail—not a profitability guarantee.

At \$900 media spend, a \$10 CPL produces about 90 leads. At a 20% close rate, that is 18 customers. To reach 35 customers with the same budget, the pilot would need roughly a \$5.15 CPL, a close rate near 39%, a higher average margin, repeat purchases, upsells—or a combination of these.

4. Measurement and the win-win growth ladder

The first 90 days remain simple: the fixed \$1,000 pilot fee covers the build, campaign management and learning period. There is no additional success fee during the pilot. After 90 days, both sides review the same CRM data and choose the next model.

Pilot scorecard

Metric	Target / guardrail	Why it matters	Source
Cost per lead	≤ \$10 target	Controls acquisition efficiency	Meta + CRM
Lead response time	≤ 10 minutes in business hours	Improves the chance of booking	CRM
Lead-to-customer rate	20% baseline	Tests sales follow-up quality	CRM
Booked appointment rate	Measured weekly	Separates lead quality from closing	Square + CRM
Contribution per job	\$55 baseline	Connects marketing to real economics	TDF
Attributable customers	23 milestone / 35 break-even	Shows commercial and full-payback progress	CRM

Recommended post-pilot ladder

The next agreement should contain a modest base fee for the real monthly work, plus a success fee only after True Diamond Finish has passed the agreed contribution hurdle. That prevents the partners from being rewarded while the client is still underwater.

90-day attributable result	Success fee	Meaning	Next move
0–22 completed jobs	\$0 per job	Pilot has not reached the commercial milestone	Fix offer, creative, page or follow-up before scaling
23–34 completed jobs	\$0 per job	Strong signal, but full pilot cost is not yet recovered	Maintain budget and improve conversion
35–45 completed jobs	\$10 per job above 35	Full pilot economics have crossed break-even	Scale carefully
46–60 completed jobs	\$15 per job above 45	Profitable, repeatable acquisition is emerging	Increase media in controlled steps
61+ completed jobs	\$20 per job above 60	High-volume performance with room to share upside	Agree capacity and expand geography/offers

Final post-pilot base fee, attribution window and tier thresholds will be confirmed after the first 90 days. A suggested attribution rule is: a completed and paid job is attributable when the original lead entered through the pilot campaign or landing page within the prior 30 days.

Why this is win-win: True Diamond Finish keeps the first part of the upside to recover the pilot investment. Autopilots and Smartleads participate only when additional completed jobs create measurable value.

5. 90-day rollout

Period	What happens	Decision / output
Week 1	Offer workshop, service radius, access, assets, tracking plan and CRM stages.	Pilot brief approved
Week 2	Landing page build, Square route, lead form, CRM pipeline and campaign preparation.	Ready for review
Week 3	Quality check, mobile review, tracking test and campaign launch.	Pilot goes live
Weeks 4–6	Test before/after angles, copy and audiences. Review lead quality and response speed.	First optimization cycle
Weeks 7–10	Keep winners, replace weak creatives and improve booking friction.	Second optimization cycle
Weeks 11–13	Consolidate results, verify closed revenue and calculate unit economics.	90-day review and next-step proposal

What we need from True Diamond Finish

- One decision-maker for the pilot and one person responsible for daily lead follow-up.
- Access needed for Meta, Square booking, domain/landing-page setup and CRM users.
- A curated asset folder: strongest 15–25 before/after sets, 3–5 videos and 3–5 testimonials.
- Confirmed packages, starting prices, service radius, working hours and appointment capacity.
- Pipeline updates within 48 hours and actual job value after completion.
- A practical response commitment during business hours; slow follow-up will be visible in the reporting.

Boundaries

- No guaranteed number of leads, bookings or sales. Paid media performance depends on market response, creative, seasonality, capacity and follow-up.
- The initial campaign is B2C mobile detailing within one agreed local service area. B2B dealership outreach and AI voice follow-up are separate future workstreams.
- Major website rebuilds, new content production, advanced AI voice agents and outbound sales services are not included in this pilot.
- True Diamond Finish owns its customer data, ad account and payment relationship with Meta.

6. Decision

RECOMMENDED NEXT STEP

Approve the 90-day pilot and start with one tightly defined local offer.

The first goal is not to scale immediately. It is to prove a repeatable route from a local ad to a completed, profitable mobile-detailing job.

Pilot approval

Pilot	90-day local growth pilot
Pilot fee	\$1,000 total — \$500 at approval and \$500 at the end of month 3
Media	Approx. \$10/day, paid directly to Meta
Target launch	Within approximately 15 business days after access and assets are received
True Diamond Finish	Name / signature / date: _____
Autopilots & Smartleads	Name / signature / date: _____

Build the system. Measure the truth. Scale what works.

Autopilots × Smartleads
